

I understand some lobbyists and various sized television and radio station owners are now putting pressure on you to eliminate some of the services that I now enjoy on my XM radio. This is a product that I listen to and enjoy in my cars and also my motorcycle when I travel. I think that is outrageous and I would be extremely upset if these benefits that I use and pay for could possibly be possibly taken away.

Please don't diminish my satellite radio services that I choose and pay for to listen to. I make the choice on what and where I listen and it shouldn't be dictated by parties that fail to develop their own product that makes me consider listening to them

It's a choice I want to continue to make.
